S1: Subtraction Reasonableness

For the tutor Use this worksheet to assess the student's subtraction fluency and number sense. Begin with Section A. If the student struggles, stop and review using objects (coins, ngers, drawings). Estimation sections are diagnostic only; do not over-explain.

Section A: Subtraction Basics

1. 10 1 = _____
2. 10 2 = _____
3. 10 3 = _____
4. 10 4 = _____
5. 9 1 = _____
6. 9 2 = _____
7. 9 3 = _____
8. 9 4 = _____
9. 8 1 = _____
10. 8 2 = _____
11. 8 3 = _____
12. 8 5 = _____
13. 7 1 = _____
14. 7 2 = _____
15. 7 3 = _____
16. 7 4 = _____
17. 10 4 = _____
18. 9 3 = _____
19. 8 5 = _____
20. 7 2 = _____

—

Section B: Subtraction Within 2

1. 11 5 = _____
2. 12 6 = _____
3. 13 7 = _____
4. 14 8 = _____
5. 15 9 = _____
6. 16 7 = _____
7. 17 8 = _____
8. 18 9 = _____
9. 19 6 = _____
10. 20 5 = _____
11. 20 7 = _____
12. 15 6 = _____
13. 12 4 = _____
14. 13 5 = _____
15. 16 9 = _____
16. 18 8 = _____

—

Section C: Estimation Using Rounding

Round then subtract compare to the unrounded answer.

For the tutor: When we ask students to "round then subtract," we want them to make a quick estimate of the answer rather than calculate exactly. First, they round each number to the nearest ten (or a convenient number). Then they subtract the rounded numbers to get an approximate answer. For example, for 18 9, round 18 → 20 and 9 → 10, then subtract 20 10 = 10. This helps students check if their exact answer is reasonable.

1. 18 9 ≈ _____
2. 32 11 ≈ _____
3. 41 19 ≈ _____
4. 37 28 ≈ _____

5. 29 $8 \approx$ _____

6. 42 $21 \approx$ _____

7. 56 $39 \approx$ _____

—

Section D: Is the Answer Reasonable?

Circle **Yes** or **No**.

1. 19 $10 = 3$ Yes No
2. 30 $12 \approx 20$ Yes No
3. 25 $5 = 30$ Yes No
4. 40 $18 \approx 10$ Yes No
5. 15 $6 = 9$ Yes No
6. 18 $9 = 8$ Yes No
7. 12 $7 = 6$ Yes No
8. 20 $15 \approx 4$ Yes No
9. 14 $8 = 6$ Yes No
10. 17 $5 = 12$ Yes No
11. 22 $9 \approx 15$ Yes No
12. 10 $3 = 8$ Yes No

Section E: Mixed Word Problems

Read each problem and write the correct answer. Circle whether you added or subtracted.

1. Sarah has 12 pencils. She gives 5 to her friend. How many pencils does she have now?
   Add / Subtract: _____
2. There are 9 birds on a tree. 6 more birds fly in. How many birds are there now?
   Add / Subtract: _____
3. Tom has 15 oranges. He eats 4. How many are left?
   Add / Subtract: _____
4. There are 8 girls and 7 boys in the classroom. How many children in total?
   Add / Subtract: _____

Section F: Subtraction – Order Matters

For the tutor: Subtraction is not commutative. That means the order of the numbers matters: 7 3 $\neq$ 3 7. Always subtract the second number from the rst. This section gives students practice recognizing and correcting this.

1. 8 3 or 3 8
2. 10 4 or 4 10
3. 7 2 or 2 7
4. 15 5 or 5 15
5. 12 7 or 7 12
6. 20 9 or 9 20

1. True or False: 5 3 = 3 5
2. True or False: 9 4 = 4 9
3. True or False: 12 8 = 8 12
4. True or False: 7 7 = 7 7
